AGILE & LEAN DEVELOPMENT PARTNER
Bacancy Technology was established in 2011 with a goal to be a value-adding and quality-oriented technology partner in the software services domain. Bacancy’s vision is to solve enterprise-level business challenges with the right mix of technology solutions.

Salient Points to Consider:

- Strength of Large Organizations, yet dynamism, flexibility & nimbleness of small ones
- Self-Funded, Profitable, with no liabilities or debts to service
- Experienced and highly competitive team of professionals
- Solutions development with global standards and a client-centric approach
- Very Low Variance on Schedule, Effort, Defect Density

We deliver the best in class Custom Software Development services, combined with our expertise in Product Engineering, AI/ML, IoT and Digital Transformation to enterprises; along with IT Staff Augmentation.
What is Bacancy?

500+ Employees
100+ Clients
300+ Projects
05 Agile Coach
Productized S3+ Services Model

Solution Assets
Horizontal technology solutions, Solution accelerators

Services Lines
Methodologies, Delivery Processes, Best practices

Skills & Competency
Breadth & depth of resource skills, Technical expertise

Services Offerings

Consulting
- Enterprise IT Strategy
- Technology Migration
- Portal Strategy
- Cloud Strategy
- Enterprise Mobility Strategy

Collaboration & Transformation
- Enterprise Portals
- Product Engineering
- Application Migration & reengineering
- Cloud Transformation

AI / ML
- Chatbot
- Predictive Analysis
- Sentiment Analysis
- BI & Analytics

Enterprise Mobility
- Enterprise Mobile Apps
- React Native, Flutter, Ionic
- Architecture; cross device compatibility

- Windows CE, LINUX, TreadX, Nucleus RTOS, OSE
- Microcontroller/RTOS
- IoT Connectivity (Wi-Fi, BLE Mesh, Zigbee, Z-Wave, Thread, and LoRaWAN)

**Enterprise Web Application**
- Java
- C# .NET
- ASP.NET
- .NET MVC
Why Choose Bacancy?

- Creative
- Personalized Service
- Proficient & Dedicated Team
- Delivery on Time
- Maintaining a Quality Code
IoT Product Enhancement

A well funded IoT startup company from Canada. Their solution monitors and tracks environmental conditions and assets for manufacturing, warehousing, food services, agriculture and, commercial building applications using sensors, edge computing and AI. It helps to wirelessly monitor temperature, humidity, critical assets, location and more.

Bacancy deployed 5 people team and supported them in product enhancement, Gateway Integrations, and new iOS mobile app development.

Healthcare Web Solution

Client is a USA based leading health care concierge company. It offers Telemedicine and Telehealth nursing solutions by combining digital and one-on-one counseling approach.

Bacancy helped in development of a web based solution to manage virtual therapy and psychiatry appointments. Patients can create Health Profiles, select preferred local pharmacy and fill the prescription online through the web solution.

eLearning Solution

Client is an education technology company based in Oxford, UK. They provide flexible online learning solutions that address key educational challenges, from structured content to courses fully taught by their own teachers.

Bacancy team is supporting client with on-going developments, new feature developments and mobile app development since last 3 years. There is a team of 8 people deployed with mix of skills such as DevOps, Angular, React, Node and RoR.
iPOS Product Development

A USA based POS product backed by Apple Inc. They wanted to develop a comprehensive POS product which caters multiple B2B, B2C, and B2E features. With this solution users can perform their daily operations from a single platform. This solution provides 24*7 service to customers and track orders, payments, employee performance, website traffic, inventory management, Cloud sync.

Bacancy collaborated with the client right from road-map design phase, and provided continuous development support for embedded programming, web development, mobile app, payment gateway integrations and DevOps.

Agriculture Web/Mobile Solution

Our client happens to be a large US based Agro Consulting firm having good network of farmers, farm product traders and agri-retailers. Bacancy developed a Web platform which is helping our client by making use of farmers’ actual information to pinpoint risk areas in order to create, execute, and monitor strategies to mitigate the risk and maximize revenue.

Bacancy team built this platform, right from technology road-map design until implementation, QA testing, release and currently we are also providing on-going support and enhancements.
How We Work?

1. Idea
2. Prototype
3. Feature Set
4. Development
5. Quality Assurance
6. Release
